

Wind Energy Conference 2019 - Registration Form

1 May, 2019, Wellington

The electricity sector is on the cusp of real change with the transition to a low-emissions economy and innovation transforming business models and driving demand growth.

This year's Conference tackles the transition head on and focuses on ensuring wind energy is best positioned to enable a low-carbon future.

The Conference theme is *Breaking New Ground* comprising four sessions with presentations covering a low carbon future, innovation and case studies with wind and other renewables, wind energy update and breaking new ground.

Registration for the Conference includes a "stand up" dinner and networking.
