Subject: website info on windenergy.org.nz

Hi there,

I was researching information on wind energy when I came across <http://www.windenergy.org.nz/>. I see you provide some great info on the subject.

My name is Virgil, and I'm a cancer patient through the carer network at mesothelioma.net. As such, it's important to me that others have access to information on very aggressive cancers and the dangers of asbestos exposure.

Mesothelioma.net has actually posted an article about the benefits of using wind and other alternative energies in regards to asbestos - <https://mesothelioma.net/alternative-energies-phase-out-asbestos/>

As I'm sure you know, the main purpose of using alternative energy is to cut down on hazardous pollutants that negatively affect our health and the planet. Many of these pollutants are released into the air during the consumption of traditional energies, such as fossil fuels. However, people also come into contact with harmful pollutants, such as asbestos, while mining for fossil fuels.

If it's not too much trouble, would you be able to assist us in helping others learn more about clean, sustainable energy, and the dangers of asbestos by including mesothelioma.net as a resource windenergy.org.nz? I'm hoping you'll find it to be a good fit.

I appreciate your time in advance. If you're decided already and would like me to stop emailing you, please let me know.

If you have any questions, please feel free to call me at 304-931-0688.

I look forward to hearing from you. Thank you!

Virgil
